## EXPERIENCE

### Senior Web/Mobile Developer / PM

#### Autofixie LLC

📅 05/2017 - 06/2018 📍 Austin, Texas

I have dedicated more than 1,000 hours to intensive training, honing my skills to become a proficient Full Stack Developer. Throughout this training, I have focused on enhancing my problem-solving abilities, critical thinking skills, and knowledge of software engineering. As a result, I am well-equipped to handle various tasks such as maintaining, developing, and deploying fully functional dynamic web and mobile applications from the ground up.

### Frontend Developer

#### Autofixie LLC

📅 01/2017 - 04/2017 📍 Austin, Texas

In addition to my technical expertise, I have a keen eye for great design and user experience, created intuitive and engaging interfaces that users keep coming back for.

## PROJECTS

### Backend conversion(PHP/Laravel to Python/Django)

📅 11/2022 - 06/2023

## SUMMARY

Over the past 7 years, I have worked as a Full Stack developer in the field of Web/Mobile Application development.

In addition to the technical skills, I have a keen eye for design and user experience, allowing me to create intuitive and engaging interfaces that keep users coming back. Throughout my career, I have been involved in both native and cross-platform development. My dedication to critical thinking, meticulousness, and staying up-to-date with the latest technologies has enabled me to progress to the position of a senior full stack developer in my current role.

Due to the pandemic, I had to transition to remote work, and I discovered that it was an exciting and efficient method of working. I thoroughly enjoyed the experience and found it to be highly productive. I always strive to build long-term professional relationships with my clients. This approach ensures that every project I undertake becomes successful.

## PROJECTS

### Frontend/Backend Development(MERN Stack)

📅 09/2018 - 11/2019   📍 Inmetrics  
🔗 <https://www.koyfin.com/cetf>

The goal was to create a platform that simplifies access management for office employees, utilizing mobile phones as virtual pass cards. In this project, I took on the role of a Full Stack Developer, leveraging the power of the MERN stack. Our system comprised complex APIs and multiple servers developed using Node.js/Express, complemented by a React/Redux front-end. As a valuable member of the development team, my responsibilities encompassed designing and implementing the primary dashboard, along with integrating various functionalities into it.

**Tech:** Node.js/Express, React.js, Redux, Cryptocurrency, GraphQL, Bootstrap 4, JQuery, JavaScript, Html5
