

# DANIEL PITT

## Senior Full Stack Developer

📧 danielpitt1027@gmail.com

📍 Singapore, Singapore

## WORK EXPERIENCE

### Senior Front-end Developer

#### Broadlume

📅 2022 - 01/2023

- Developed a website to introduce the flooring industry and announce conferences on flooring technology
- Revised and updated the UI/UX design based on development needs
- Implemented the UI/UX design using React Gatsby and Bootstrap
- Tracked and fixed bugs and issues using GitHub as an issue tracking board

### Senior Full-stack Developer

#### Tiny Talk

📅 2020 - 2022

- Developed a social app that allows random one-to-one or group video chats that last seven minutes.
- Implemented a server-less back-end solution using Firebase Authentication.
- Built a mobile app and implemented a complicated UI/UX design using Flutter.
- Implemented one-to-one and group video calls on the app using Agora RTC Engine.
- Implemented deep linking to channels and video calls using Firebase Dynamic Links.

### Senior Mobile App Developer

#### Kiskoo

📅 2016 - 2020

- Developed several mobile apps to show instant results of all lotteries played in the United States and Latin America, especially in the Dominican Republic. More than 500,000 users use them.
- Integrated an API for Conectate Sports to get lottery data.
- Developed mobile apps and implemented complicated UI and UX with React Native, Redux, and Redux Thunk.
- Implemented banner, reward, and interstitial ads using Google AdMob.

### Senior Full-stack Developer

#### Kiskoo

📅 2013 - 2016

- Developed a website to satisfy the needs of different sectors of the Dominican market including the movie music technology automotive sports tourism fashion and other industries.
- Tracked and fixed bugs and issues using Jira a reporting tool.
- Developed several subdomains using WordPress CakePHP, React, HTML, CSS, JavaScript, and Bootstrap.
- Implemented search engine optimization using Google Tag Manager and Ahrefs.
- Implemented banner, interstitial, and reward ads using Google Ads.

## SUMMARY

I am a skilled full-stack developer with 8 years of experience in web/mobile app development/API, DevOps, AI, and blockchain. I have built several successful websites, mobile apps, and DeFi platforms with hundreds of thousands of users while working as a senior developer, lead developer, or product manager. Following clients' business ideas, I have completed over 10 projects involving various technological fields from scratch.

Due to the pandemic, I had to transit to remote work, and I discovered that it was an exciting and efficient method of working. I thoroughly enjoyed the experience and found it to be highly productive.

I values honor, integrity, and teamwork.

## EDUCATION

Master's Degree in Software Development, Informational Communication Engineering

National University of Singapore

📅 2008 - 2012

## SKILLS

### Web Frontend

HTML

CSS

JavaScript

JQuery

TypeScript

Bootstrap

React

Vue

Angular

# PROJECTS

## React Frontend Development

📅 2022 📍 Sun-Asterisk Inc

Working for this company was my golden period, I got many opportunities to develop extended web applications. I extended my skills larger to the frontend part based on backend experience and I started to approach full stack more easily. What I tried to join to develop are as follows:

- <https://whatsyourgusto.com>
- <https://aliabdaal.com/articles>
- <https://www.leifshop.com>
- <https://debut.shonenmagazine.com/>

## Backend conversion(PHP/Laravel to Python/Django)

📅 2022  
🔗 <https://infcurion.com/>

Infcurion is a website that provides platforms, consulting, etc. centered on the financial and payment fields. It provides various services, employment information, and news and inquiry.

## Frontend/Backend Development(MERN Stack)

📅 2019 📍 Inmetrics  
🔗 <https://www.koyfin.com/cetf>

The goal was to create a platform that simplifies access management for office employees, utilizing mobile phones as virtual pass cards. In this project, I took on the role of a Full Stack Developer, leveraging the power of the MERN stack. Our system comprised complex APIs and multiple servers developed using Node.js/Express, complemented by a React/Redux front-end. As a valuable member of the development team, my responsibilities encompassed designing and implementing the primary dashboard, along with integrating various functionalities into it

# SKILLS

## Web Backend

**PHP** **Python** **Laravel** **Django**

**NodeJS** **Express** **ASP.NET**

## Mobile App Native

**Android:Java** **Kotlin** **Swift**

## Mobile App Cross-Platform, Hybrid

**Flutter** **React Native** **Xamarin**

## DB, Cloud Services

**MySQL** **SQLite** **MongoDB**

**PostgreSQL** **AWS** **GoogleMaps**

**Firebase** **Twilio**

## UI/UX Design

**Figma** **Adobe XD** **Photoshop**
